 Message |  Sarost visit.doc (84 Ko)

Dear Riadh

Thanks again for the time and effort shown in cooperating with our visit.

From the OMV and TPS HSEQ side, it was refreshing to see a service provider that is so proactive in HSEQ issues and willing to continually improve their performance.

I am glad to say, as already mentioned by Mr Morrison, that following the initial visit of the SAROST Logistics base and the preliminary documentation check, your company appears to comply with minimum HSEQ requirements for both TPS and OMV. Your company seems to have an HSEQ culture that is well implemented amongst the personnel we saw during our visit.

As promised, though, I would like to provide a few observations made during the visit, that you may wish to consider from a continuous improvement point of view. Please find attached.

In addition to this, I would like to arrange for a visit (from the HSEQ OMV and TPS team) to the other 2 Sfax based operations - Vessel and Subsea. When in December would this be possible?

Thanks again for your time.

Jean-Paul van der Ende
